Search

Search ☒ Smart Multi-Search

Full Search: Enter up to three part numbers. All matching records are returned for each part.

Multi-Search: Enter up to 100 part numbers. The best 10 matching records are returned for each part. All matching records can be retrieved by clicking the 'Full Results' link.

Smart Multi-Search: Like Multi-Search, you can enter up to 100 part numbers. The Smart Multi-Search option groups results by supplier, with the supplier(s) containing the most matches appearing first. This option greatly simplifies the identification and RFQ process for suppliers that have in stock multiple part numbers that you are searching for.
